

Template Week 2 – Logic

Student number:

545676

Assignment 2.1: Parking lot

Which gates do you need?

And gate

Complete this table

Parking lot 1	Parking lot 2	Parking lot 3	Result (full)
0	0	0	0
0	0	1	0
0	1	0	0
1	1	0	0
0	1	1	0
1	0	0	0
1	1	1	1
1	0	1	0

Assignment 2.2: Android/iPhone

Which gates do you need?

Xor gate

Complete this table

Android phone	iPhone	Result (Phone in possession)
0	0	0
0	1	1
1	0	1
1	1	0

Assignment 2.3: Four NAND gates

Complete this table

A	B	Q
0	0	0
0	1	1
1	0	1
1	1	1

How can the design be simplified?

4 nand gates act as or gate.

Assignment 2.4: Getting to know Logisim evolution

Screenshot of the design with your name and student number in it:

545676 Mehmet Alper Tas

Assignment 2.5: SR Latch

Screenshot SR Latch in Logisim with your name and student number:

545676 Mehmet Alper Tas

Assignment 2.6: Vending Machine

Screenshot Vending Machine in Logisim with your name and student number:

545676 Mehmet Alper Tas

Bonus point assignment – week 2

Create a java program that accepts user input and presents a menu with options.

1. Is number odd?
2. Is number a power of 2?
3. Two's complement of number?

Implement the methods by using the bitwise operators you have just learned.

Organize your source code in a readable manner with the use of control flow and methods.

Paste source code here, with a screenshot of a working application.

```
import java.util.Scanner;

public class Main {

    public static void main(String[] args) {

        Scanner scanner = new Scanner(System.in);

        boolean app = true;

        while (app) {

            System.out.println("1. Is number odd?");

            System.out.println("2. Is number a power of 2?");

            System.out.println("3. Two's complement of number?");

            System.out.println("4. Exit");

            System.out.print("Enter your choice: ");

            int choice = scanner.nextInt();

            if (choice == 4) {

                app = false;

                break;

            }

            System.out.print("Enter a number: ");

            int number = scanner.nextInt();

            if (choice == 1) System.out.println("Is the number odd? " + isOdd(number));
```

```

        else if (choice == 2) System.out.println("Is the number a power of 2? " +
isPowerOfTwo(number));

        else if (choice == 3) System.out.println("Two's complement of the number: " +
twosComplement(number));

        else System.out.println("Invalid choice. Please try again.");
    }
    scanner.close();
}

```

```

private static boolean isOdd(int num) {
    return (num & 1) != 0;
}

```

```

private static boolean isPowerOfTwo(int num) {
    return num > 0 && (num & (num - 1)) == 0;
}

```

```

private static int twosComplement(int num) {
    return ~num + 1;
}

```

Output

```

1. Is number odd?
2. Is number a power of 2?
3. Two's complement of number?
4. Exit
Enter your choice:

```

```

}

```
