Template Week 4 – Software

Student number:

545676

Assignment 4.1: ARM assembly

Screenshot of working assembly code of factorial calculation:

```
        Open
        Run
        250
        Step
        Reset
        Register
        Value

        1 Main:
        R1
        78

        2 mov r2, #5
        R2
        1

        3 mov r1, #1
        R3
        0

        4
        R4
        0

        5 Loop:
        R5
        0

        6 cmp r2, #1
        R6
        0

        7 beq End
        R6
        0

        8 mul r1, r1, r2
        R7
        0

        9 sub r2, r2, #1
        R8
        0

        10 b Loop
        R9
        0

        11
        R10
        0

        13 |
        R11
        0

        R11
        0
        R12
```

Assignment 4.2: Programming languages

Take screenshots that the following commands work:

javac -version

```
mat2004@mat2004-VMware-Virtual-Platform:~$ javac --version
Command 'javac' not found, but can be installed with:
sudo apt install openjdk-17-jdk-headless # version 17.0.12+7-1ubuntu2~24.04, or
sudo apt install openjdk-21-jdk-headless # version 21.0.4+7-1ubuntu2~24.04
sudo apt install default-jdk # version 2:1.17-75
sudo apt install openjdk-11-jdk-headless # version 11.0.24+8-1ubuntu3~24.04.1
sudo apt install openjdk-8-jdk-headless # version 8u422-b05-1~24.04
sudo apt install ecj # version 3.32.0+eclipse4.26-2
sudo apt install openjdk-19-jdk-headless # version 19.0.2+7-4
sudo apt install openjdk-20-jdk-headless # version 20.0.2+9-1
sudo apt install openjdk-22-jdk-headless # version 22~22ea-1
mat2004@mat2004-VMware-Virtual-Platform:~$
```

java -version

```
mat2004@mat2004-VMware-Virtual-Platform:-$ java --version
Command 'java' not found, but can be installed with:
sudo apt install openjdk-17-jre-headless # version 17.0.12+7-1ubuntu2~24.04, or
sudo apt install openjdk-21-jre-headless # version 21.0.4+7-1ubuntu2~24.04
sudo apt install default-jre # version 2:1.17-75
sudo apt install openjdk-11-jre-headless # version 11.0.24+8-1ubuntu3~24.04.1
sudo apt install openjdk-8-jre-headless # version 8u422-b05-1~24.04
sudo apt install openjdk-19-jre-headless # version 19.0.2+7-4
sudo apt install openjdk-20-jre-headless # version 20.0.2+9-1
sudo apt install openjdk-22-jre-headless # version 22~22ea-1
mat2004@mat2004-VMware-Virtual-Platform:-$
```

gcc -version

```
mat2004@mat2004-VMware-Virtual-Platform:~$ gcc --version

Command 'gcc' not found, but can be installed with:

sudo apt install gcc

mat2004@mat2004-VMware-Virtual-Platform:~$
```

python3 -version

```
mat2004@mat2004-VMware-Virtual-Platform:~$ python3 --version
Python 3.12.3
```

bash -version

```
mat2004@mat2004-VMware-Virtual-Platform:~$ bash --version
GNU bash, version 5.2.21(1)-release (x86_64-pc-linux-gnu)
Copyright (C) 2022 Free Software Foundation, Inc.
License GPLv3+: GNU GPL version 3 or later <http://gnu.org/licenses/gpl.html>

Assignment 4.3: Compile

Which of the above files need to be compiled before you can run them?

Fibonacci.java, fib.c

Which source code files are compiled into machine code and then directly executable by a processor?

fib.c

Which source code files are compiled to byte code?

Fibonacci.java

Which source code files are interpreted by an interpreter?

fib.py, fib.sh

These source code files will perform the same calculation after compilation/interpretation. Which one is expected to do the calculation the fastest?

fib.c

How do I run a Java program?

Run with java interpreter.

How do I run a Python program?

Run with python interpreter.

How do I run a C program?

Compile and run with compiler.

How do I run a Bash script?

Make sure if executable and run with bash.

Take relevant screenshots of the following commands:

- Compile the source files where necessary
- Make them executable
- Run them
- Which (compiled) source code file performs the calculation the fastest?

Assignment 4.4: Optimize

Take relevant screenshots of the following commands:

a) Figure out which parameters you need to pass to the gcc compiler so that the compiler performs a number of optimizations that will ensure that the compiled source code will run faster. Tip! The parameters are usually a letter followed by a number. Also read page 191 of your book, but find a better optimization in the man pages. Please note that Linux is case sensitive.

Ofast for highest speed.

b) Compile fib.c again with the optimization parameters

```
mat2004@mat2004-VMware-Virtual-Platform:~$ gcc /home/mat2004/Downloads/code/fib.
c -o fib
mat2004@mat2004-VMware-Virtual-Platform:~$ ./fib
Fibonacci(18) = 2584
Execution time: 0.23 milliseconds
mat2004@mat2004-VMware-Virtual-Platform:~$ ^[[200~gcc -Ofast fib.c -o fib
gcc: command not found
mat2004@mat2004-VMware-Virtual-Platform:~$ gcc -Ofast fib.c -o fib
                  fib.c: No such file or directory
compilation terminated.
mat2004@mat2004-VMware-Virtual-Platform:~$ cd /home/mat2004/Downloads/code
mat2004@mat2004-VMware-Virtual-Platform:~/Downloads/code$ gcc -Ofast fib.c -o fi
mat2004@mat2004-VMware-Virtual-Platform:~/Downloads/code$ ./fib
Fibonacci(18) = 2584
Execution time: 0.02 milliseconds
mat2004@mat2004-VMware-Virtual-Platform:~/Downloads/code$
```

- c) Run the newly compiled program. Is it true that it now performs the calculation faster? Yes
- d) Edit the file **runall.sh**, so you can perform all four calculations in a row using this Bash script. So the (compiled/interpreted) C, Java, Python and Bash versions of Fibonacci one after the other.

```
Running C program:
Fibonacci(19) = 4181
Execution time: 0.04 milliseconds

Running Java program:
Fibonacci(19) = 4181
Execution time: 4.83 milliseconds

Running Python program:
Fibonacci(19) = 4181
Execution time: 2.12 milliseconds

Running BASH Script
Fibonacci(19) = 4181
Excution time 43475 milliseconds
```

Bonus point assignment - week 4

Like the factorial example, you can also implement the calculation of a power of 2 in assembly. For example you want to calculate $2^4 = 16$. Use iteration to calculate the result. Store the result in r0.

Main:
mov r1, #2
mov r2, #4
Loop:

End:

Complete the code. See the PowerPoint slides of week 4.

Screenshot of the completed code here.

Ready? Save this file and export it as a pdf file with the name: week4.pdf
